

# 74V Electrician Test Light

## RH-ETL

### Description:

For decades, Railroad and electricians alike have been building their own test lights leading to inconsistencies, wasted time, and extra liability exposure on the railroads themselves. Railhead's new 74V Electrician Test Light allows railroads to standardize across their system in testing for control grounds on locomotive control circuits or diagnose manual relays.

### Features:

- ▶ Test for control grounds on locomotive control circuits diagnose manual relays
- ▶ Visible from a 360 degree radius through protective lens
- ▶ Leads combine to make a handy jumper
- ▶ Overload protected by a fuse
- ▶ Strong magnetic base

### Benefits:

- ▶ Railroads no longer have to build their own lights
- ▶ Standardization across the company
- ▶ Take the liability off the railroad and pass it onto the supplier

Includes 6ft long  
Alligator clips & probes

Strong  
magnetic base
